The ten-episode series can be found in its entirety on the platform.In the public arena as in life, we are forged by every battle, and each character will have theirs to face. León (Ecko) builds his path in competitions and seeks to reach the big leagues while trying to rebuild his emotional world. The new original production focuses on three areas involving the main characters: the path to personal transformation, with real, relatable stories; the representation of a new, heterogeneous and genuine generation that is free from prejudice; and the cultural phenomenon of freestyle rap as a means for the characters to find their own way.
